References, Legends & Descriptions of Data Sources

Population References and Description

Population Statistics
The population statistics have been calculated into the following age bands;
- *Children 0 – 15*
- *Working Age 16—65*
- *Pensionable Age 65+*

The percentage is calculated based on total population.
The data source is the 2015 Ward population estimates for England and Wales, Single year of age mid-2015 (experimental statistics), NOMIS

Area and Population Density
The hectares per ward were calculated using information from a Map Info geographical file export.
The population density is calculated using the 2015 Ward population estimates for England and Wales, Single year of age mid-2015 (experimental statistics), NOMIS and the hectare figures included above.

Cheshire East Council

Acorn Category Legend

- Affluent Achievers
- Rising Prosperity
- Comfortable Communities
- Financially Stretched
- Urban Adversity
- Not Private Households

Acorn Group Descriptions

Affluent Achievers - *This group can be broken down into three sub-categories. Lavish lifestyles, Executive Wealth and Mature Money. "Most of these people are owner occupiers, with half owning their home outright and the remainder often having significant equity in their homes."*

Rising Prosperity - *This group can be broken down into two sub-categories. City Sophisticates and Career Climbers. "While many have good incomes not all might yet have had time to convert these into substantial savings or investments."*

Comfortable Communities - *This group can be broken down into five sub-categories. Countryside Communities, Successful Suburbs, Steady Neighbourhoods, Comfortable Seniors and Starting Out. "Most people are comfortably off. They may not be very wealthy, but they have few major financial worries."*

Financially Stretched - *This group can be broken down into four sub-categories. Student Life, Modest Means, Striving Families and Poorer Pensioners. "While many people in this category are just getting by with modest lifestyles a significant minority are experiencing some degree of financial pressure."*

Urban Adversity - *This group can be broken down into three sub-categories. Young Hardship, Struggling Estates and Difficult Circumstances. "These are the people who are finding life the hardest and experiencing the most difficult social and financial conditions."*

Not Private Households - *This group can be broken down into three sub-groups. Active communal population, Inactive communal population and Business addresses without resident population. "These are postcodes where the bulk of the residents are not living in private households."*

Acorn Wellbeing Group Descriptions

Health Challenges – *This group can be broken down into five sub categories: Limited living, Poorly pensioners, Hardship heartlands, Elderly ailments and Countryside complacency. "These areas contain the population with the greatest levels of illness and consequently, those with the greatest health challenges and risky behaviours now and in the past."*

At Risk – *This group can be broken down into eight sub categories: Dangerous dependencies, Struggling smokers, Despondent diversity, Everyday excesses, Respiratory risks, Anxious adversity, Perilous futures and Regular revellers. "Multiple unhealthy behaviours, as a result of their lifestyles, could put their health at risk in the future."*

Caution – *This group can be broken down into five sub categories: Rooted routines, Borderline behaviours, Countryside concerns, Everything in moderation and Cultural concerns. "Some behaviours do create health risks and may result in lifestyle related ailments in time."*

Healthy – *This group can be broken down into seven sub categories: Relishing retirement, Perky pensioners, Sensible seniors, Gyms and juices, Happy families, Five-a-day grey, Healthy wealthy and wine. "Their health, given their age, is especially good with very low levels of illness and good lifestyle behaviours "*

Not Private Households - *This group can be broken down into three sub-groups. Active communal population, Inactive communal population and Business addresses without resident population. "These are postcodes where the bulk of the residents are not living in private households."*

Box Chart and Data Table — References and Description
The box plots represent the distribution of values, at ward level, across Cheshire East. The line in the centre of the box plot is the ward average (median), which may not necessarily be the same as the Cheshire East average. The CE average is shown on the accompanying table. The coloured box either side of the ward represents the range where 25% of ward values are above and below this ward average. The lines extending from either side then indicate the range beyond this, with the dots indicating outliers which are considerably different from the values for other wards. A wider box therefore indicates a wider range of values at ward level. Finally, the triangle represent the value for the individual ward. In the example below, the ward value is one of the lowest for KS5 average point score in Cheshire East, but there are 3 other wards (outliers) with values substantially lower than the ward.
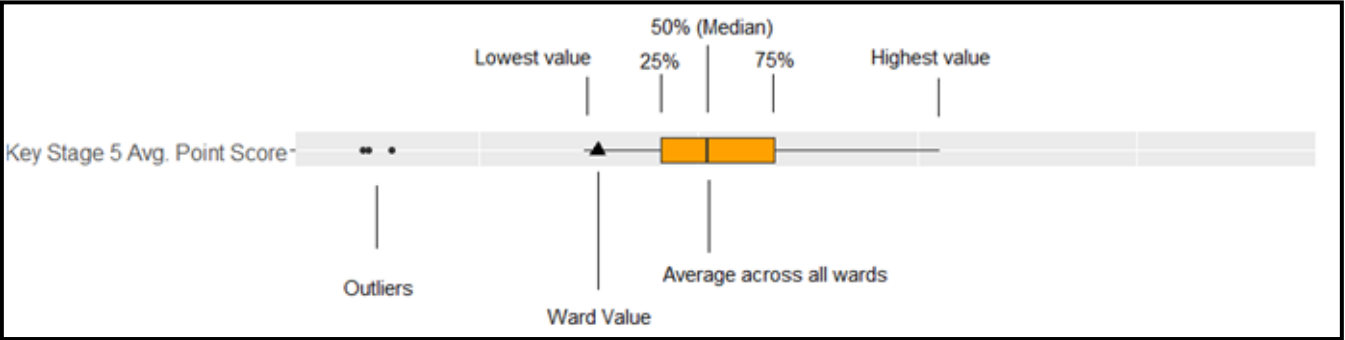

Box Chart and Data Table — References and Description Continued

Note, as the values are on different scales – some are percentages, some are rates, some are values in pounds sterling etc – the values have been centred and scaled so that comparisons can be made across different variables.

KS4 - achieving 5+ A* to C including English & Maths - 2016 Key Stage 4 Results* for pupils residing in and attending schools in Cheshire East -   Number and Percentage of   Pupils achieving the English Baccalaureate The English Baccalaureate is not a test or qualification; it is a measure used to provide information about a particular range of qualifications. A pupil is considered to have 'achieved' the English Baccalaureate if they got a grade C or better in the following subjects: English, maths, sciences, a language and either history or geography. Education Team Cheshire East Council . Results are for those pupils residing in and attending schools in Cheshire East.

KS4 - English & Maths A* - C2016 Key Stage 4 Results - 2016 Key Stage 4 Results are for pupils residing in and attending schools in Cheshire East - Number and Percentage of Pupils achieving A* to C GCSE in English and mathematics. Education Team Cheshire East Council. Results are for those pupils residing in and attending schools in Cheshire East.

KS5 - (A level + equivalent) average points per pupil - 2016 Key Stage 5 Results are for pupils residing in and attending schools in Cheshire East. Education Team Cheshire East Council.

Crimes - rate per 1,000 population- All Crime Data - supplied by the Data Delivery Unit, Cheshire Constabulary 2016,Data Period April 2015 to March 2016 and 2015 Ward population estimates for England and Wales, Single year of age mid-2015 (experimental statistics), NOMIS Individual Crime proportions are calculated using All Crime Data - supplied by the Data Delivery Unit, Cheshire Constabulary 2016.

% NEET by Ward Cohort -   Cheshire East, Youth Support Service, NEET by Ward Quarterly, this includes young people aged 16/17 (up to their 18th birthday). Please note the data is not comparable with previous year , Data Period November 2016 Data.

Claimant % 16-64 – Calculated using Claimant count by sex and age, ONS Crown Copyright Reserved [from Nomis on 5 January 2017], data period November 2016 data and 2015 Ward population estimates for England and Wales, Single year of age mid-2015 (experimental statistics), NOMIS.

Average House Prices (Median) - Calculated using an average of median house price data for sales in 2015 and 2016, Land Registry Price Paid data, collated January 2017.

Fuel Poverty—% in Fuel Poverty - is an estimate by Cheshire East ward, calculated using the sub regional Fuel Poverty data by LSOA, England 2014 Department of Energy and Climate Change. The estimates should only be used to look at general trends and identify areas of particularly high or low fuel poverty rather than trends or analysis over time due to their experimental nature.
