

Health, Wellbeing & Cost of Living Grants

*Our community offer – supporting communities
to respond to local need in 2023/2024*

Cheshire East Council prides itself on supporting the Voluntary Community, Faith and Social Enterprise (VCFSE) Sector. Having a responsive grants process, a good relationship with the sector and a shared understanding of meeting either existing or emerging needs of the community, allows for systematic partnership working. The needs of our communities can change and the need to pilot and test service delivery to sense check what works in what areas is important and we aim to do this through grant allocation.

In 2022 as part of the integration agenda, Cheshire and Wirral Partnership, NHS Cheshire and Merseyside, Cheshire East Council and the VCFSE sector worked collaboratively to design and deliver a grants programme aimed at improving the physical and mental wellbeing of the local population and reduce health inequalities.

In addition to health and wellbeing grants, the VCFSE told us about the cost-of-living implications on them and their beneficiaries. In response to this we announced a cost-of-living grant, funded through the UK Shared Prosperity Government Levelling Up Fund.

It is important that once providers are grant funded, we continually work alongside them to enhance relationships between the public sector and VCFSE sector and shared learning between grant recipients.

The purpose of this document is to ensure the grant funded provision is accessed by those who need it most. This document can be shared with communities, residents and professionals. The project information included is only a small part of what the individual organisations do and also timescales vary for each organisation, so please contact them directly to discuss if you would like further information.

To make your search for services easy, we have used a key to show geographic delivery area and theme for each organisation. You can also click on the link to the organisation’s websites. All this information is also accessible via Cheshire East Live Well site: [Cheshire East Livewell](#). There will be volunteering opportunities available through all these organisations, so please contact the organisations directly for more information, or for other volunteering opportunities across Cheshire East please visit [CE People Helping People](#)
